ABOUT ME

Telecommunications Systems Engineer graduated from **Universidad Politécnica de Madrid**, with a strong background in communication systems, networking, and technical support. My approach combines deep knowledge of **TCP/IP networks**, **telecommunications infrastructure**, and **problem-solving** oriented towards ensuring reliable and optimized connectivity for critical business operations.

I am highly task-oriented and experienced in diagnosing and resolving hardware, software, and network issues. With strong customer service and interpersonal skills, I excel at communicating complex technical information in lay-terms to end-users, ensuring seamless service delivery and user satisfaction.

I am looking for an opportunity to leverage my **telecommunications** expertise and **technical support** capabilities to maintain and enhance global branch office networks in a dynamic team environment.

TECHNICAL STACK

TELECOMMUNICATIONS & NETWORKING

TCP/IP Architecture • Network Troubleshooting • Voice & Data Circuits • Radiocommunication • Hardware & OS Support • Telephony Systems

TECHNICAL SUPPORT & TOOLS

Helpdesk Procedures • Customer Service • Issue Resolution • Technical Documentation • Linux / Windows OS • Agile Methodologies

CLOUD & DEVOPS

Docker • CI/CD • GitHub Actions • Cloudflare • Vercel • Git

SCRIPTING & DEVELOPMENT

Python • JavaScript • Bash Scripting • C • SQL • REST API

AI & DATA PROCESSING

Automation Scripts • Data Pipelines • Python Data Tools • Deep Learning • Image Processing • Computer Vision

SOFT SKILLS

Diplomacy & Patience • Independent & Team Work • Clear Communication • Self-Motivated • Adaptability • Analytical Thinking

Languages: Spanish (Native) • English (B2 – Aptis ESOL, British Council)

PROFESSIONAL EXPERIENCE

AI Engineer Intern | CSIC – Institute of Physical and Information Technologies (ITEFI)

Sep 2025 – Feb 2026

- Configured and managed development environments (**Linux/Windows**) and resolved complex software and dependency issues across multiple platforms independently.
- Provided **technical support** and generated comprehensive **documentation** for tools, workflows, and procedures used by the RESULT research group.
- Developed automated scripts to optimize data processing, empowering the research team to improve operations and service delivery.
- Analyzed, identified, and **resolved technical problems** diplomatically and patiently, translating complex requirements into effective engineering solutions.
- Performed performance analysis and system optimization, ensuring high-quality operations and system stability.

Technical Support | Troubleshooting | Linux/Windows | Documentation | Scripting | Problem Solving

EDUCATION

Telecommunications Systems Engineering | **Universidad Politécnica de Madrid (ETSIT-UPM)** *Sep 2020 – Jul 2025*

- **Networking & Systems:** Extensive study of TCP/IP architecture, network protocols (routing, switching), operating systems, and distributed systems.
- **Telecommunications Principles:** In-depth knowledge of carrier-provided data, communication systems, spectral analysis, and digital signal processing.
- **Programming & Scripting:** Data structures, object-oriented programming, and algorithm design (C, Python, Java) for automation and system management.
- **Electronics & Hardware:** Microprocessors, hardware-software integration, and branch office hardware fundamentals.

Java | C | Python | Networking | DSP | Algorithms

Technology Baccalaureate, **IES Isabel la Católica** *2018 – 2020*

Science and Technology track. Honours. Strong foundation in mathematics and physics.

CERTIFICATIONS

AI and Productivity (Google): Efficient use of AI tools and automation workflows. •

Generative AI (MIT): Implementation of GenAI solutions and sentiment analysis. •

Internet of Things (MIT): IoT solutions for smart homes and precision agriculture. •

Digital Transformation (MIT): Technology strategy and business digitalization. •

Aptis ESOL B2 (British Council): Official English certification accrediting full linguistic competence (CEFR). Assessment of Reading, Writing, Listening and Speaking, demonstrating ability to work in professional environments and understand complex technical language.

KEY PROJECTS

IT Infrastructure & Automation SYSTEM ADMIN

LINUX • BASH/PYTHON • TCP/IP

Network deployment and environment automation.

Configuration and deployment of virtualized environments and local networks. Implementation of automated scripts for system maintenance, software provisioning, and network monitoring, ensuring optimal performance and minimal downtime.

- Troubleshooting of network connectivity and operating system configurations.
- Creation of technical documentation and support procedures for system environments.

Scientific Data Automation Platform PROCESSING PLATFORM

PYTHON • DOCKER • DESKTOP IT

Automated analysis pipeline for research environments.

Development of reliable desktop applications and processing scripts to support laboratory teams. Focused on providing an intuitive interface for non-technical users, requiring extensive testing and user support to guarantee smooth operation.

- Reduced complex processing tasks from 4-8 hours to less than 5 minutes.
- Designed robust error-handling and provided user-oriented technical support.
